

## Safeglass®

### What can Safeglass® do for you?

Safeglass® can be used almost anywhere that broken glass poses a threat.

Safeglass® was introduced to the emergency break-glass market in 1997 and has been received with enthusiasm by safety-conscious train companies, hospitals, schools, fire alarm manufacturers, emergency equipment providers to name a few.

We receive new ideas and enquiries from people interested in using Safeglass® for applications specific to them and product development is an on-going process.
