

## Products

### Emergency Equipment

Safeglass is the ideal material for break-glass style emergency equipment where the glass has to be broken. It breaks into pieces that do not cause injury. What's more, the strength of Safeglass can be controlled so that even a child could break the glass if required.

Our range includes:

- Key Boxes
- Hospital Oxygen Shut Off Valves
- Emergency Door Bolts

This list is by no means exhaustive - we can produce Safeglass to almost any size or shape. We work with our clients to develop solutions for new or existing applications.
